

Genoa

CL-10000~CL-10007

Our Genoa fixtures are real light engines. Their job is to broadcast light through the shadows. The fixtures themselves are attractive but the light they produce is much more important than their looks. Gigantic foot candle levels can be achieved by proper placement of these lights. Where side illumination might be a glare issue with a lighted acrylic or glass fixture, our Genoa's will produce directional flood and up lighting without compromise. Many color and reflector options to choose from. And our LED models will be one of the wisest investments you could make...just right!
