

Bombay

CL-10700~CL-10708

Our Bombay fixtures are low profile drums composed of several overlapping layers of metal or acrylic. Far from being seamless as most of our designs are, the Bombay is purposefully open at the segment joints to allow just a hint of light to pass through and add to the overall "puzzle" quality of the fixtures. You still can't look inside to see the lamps, but the construction makes you want to. We build Bombay a variety of materials. We show metal sheet that has been overlapped with wood veneer in the pendant above. It is also available in a variety of acrylics as well.
