Sherwood

CL-14700~CL-14702

Our Sherwood fixtures are just a little difficult to describe. But if you can imagine a flat tree hanging in your living room with a few lights in the middle, that should be pretty close. Sherwood fixtures are made from seasoned woods, usually from large trees at the end of their growth cycles. The grain features fine annual rings from multiple years of forest growth. This wood is layered to about 3" thickness, then planed and sanded to finished height after being kiln dried for a few months. These are beautiful constructions meant to be enjoyed for decades.

~Sherwood Series~
