

Montreux

PD-15103~PD-15131

Our Montreux fixtures are heavy duty drums featuring massive vertical and horizontal straps both inside and out. We build them for areas needing rugged good looks coupled to powerful lumen outputs. From underneath, Montreux looks like a series of pie slices with dividers in between. Those "slices" are actually the "doors" for relamping these lights. Move them to gain easy access to lamps and LED modular strips. We have found that mounting a piece of clear ribbed acrylic in front of the main diffuser panels will add a major sense of depth to these lights. We recommend it!
