**PD-4400~PD-4421**

Our Guthix fixtures are amazing recreations of a classic gasolier style pendant. We hand pour all the brass components here in the shop. The large arms are done in sand. The delicate leaves are done in lost wax. Make no doubt about it, these are fixtures made for federal buildings. They feature olive leaves and berries (13 of them) as well as eagles and fasces ribbon bindings in the arms. You would have seen them in the 1880's as a gas fired light. The top smoke bell was meant to catch much of the exhaust, and the opal ball is ventilated at top for easy combustion flow thru. Rare lights made available today.
