

Vigo

SC-4600~SC-4611

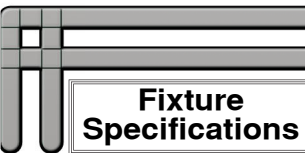

Our Vigo sconces may remind you a bit of a gymnastics spring board. But, they really are light fixtures. And they are capable of producing quite a lot of light. Most of those lumens would be available as indirect light, but the rectangular slots cut into the sides and front of Vigo are the light sources that really add the ambiance required in a room. We build these fixtures from non-ferrous metals...brass and aluminum. They look great in long hallways and large square rooms. Mount them on columns with our uplight options and enjoy the effect. Many finishes and LED lampings available.
