## SC-7700~SC-7711

Our Beatriz fixtures are really just works of art in the guise of commercial light fixtures. We hand blow each piece of glass and then shape it to lock into the metal fitter at top. During the blowing process we are constantly dipping it into cooling water to install fractures into the molten glass shape. Lots of heat and steam involved in this process make for a one of a kind product that is as timeless as it is beautiful (as the name implies). We are happy to be able to offer these fixtures as a standard item in our portfolio and hope there are many places that need something so unique.
