# Santiago

SC-8700~SC-8711

Our Santiago fixtures are sturdy metal frames with small-hole perforated panels top and bottom. The interior of the frame is lined with thick acrylic panels. The result is a dynamic fixture with very durable square corners and the potential for wet location mounting. Santiago sconces and pendants are clean-lined contemporary fixtures that still seem right at home in a castle setting. The perforated panels in the fixtures throw patterned light that will actually make for some very interesting shadows on adjacent structures. We offer these lights in many colors and lampings. Very nice!

~Santiago Series~
